ABOUT THE CENTER FOR INTERNATIONAL BUSINESS CYCLE RESEARCH

The Center for International Business Cycle Research, established in 1979, specializes in the study of trends and fluctuations in economic growth and inflation in the United States and other countries. The data contained in this publication are the result of its ongoing research programs on international business cycles. Readers are invited to submit comments and suggestions concerning this publication. In addition, readers wishing to secure historical data for the series shown may do so by communicating with:

ABOUT THIS REPORT

INTERNATIONAL ECONOMIC INDICATORS (IEI) provides a monthly look at 143 economic time series covering nine industrial countries (fifty of these series are unavailable in any other source).

The basic research underlying the compilation began in 1974, under the direction of Dr. Geoffrey H. Moore and Dr. Philip A. Klein, following the methodology for selecting and evaluating indicators for the U.S. economy (published by the U.S. Department of Commerce in *Business Conditions Digest*). Additional indicators and other countries will be included in the compilation as the Center's research program develops.

The dominant feature of **IEI** is the composite indexes section, in which leading and coincident cyclical indexes are presented for eight major industrial countries and for groups of countries. Studies by the Center have shown the usefulness of these cyclical indexes for forecasting, measuring and interpreting short-term fluctuations in aggregate economic activity, inflation, employment and foreign trade flows. Cyclical indicators are economic time series which have been identified as leaders, coinciders, or laggers based on their original conformity to cyclical movements in aggregate economic activity.

NEW FEATURES AND CHANGES FOR THIS ISSUE

Changes are made from time to time in IEI to incorporate recent findings of the Center's international business cycle research, newly available series, and revisions made by source agencies of the Center. These changes may result in revisions of data, additions or deletion of series, changes in the composition of indexes, etc.

Note: All series are adjusted for seasonal variations unless designated NSA. Series designated quarterly (Q) are interpolated monthly with the quarterly figure placed at the mid-month of the quarter.
